How to Access Documentation on Discord

**Thank you for purchasing the Low Poly Shooter Pack!**

This is a quick guide explaining how to access the documentation for the asset.

To ensure that only verified customers receive support and access to our documentation, we have implemented a Discord verification system. This measure is in place to prevent piracy of the asset.
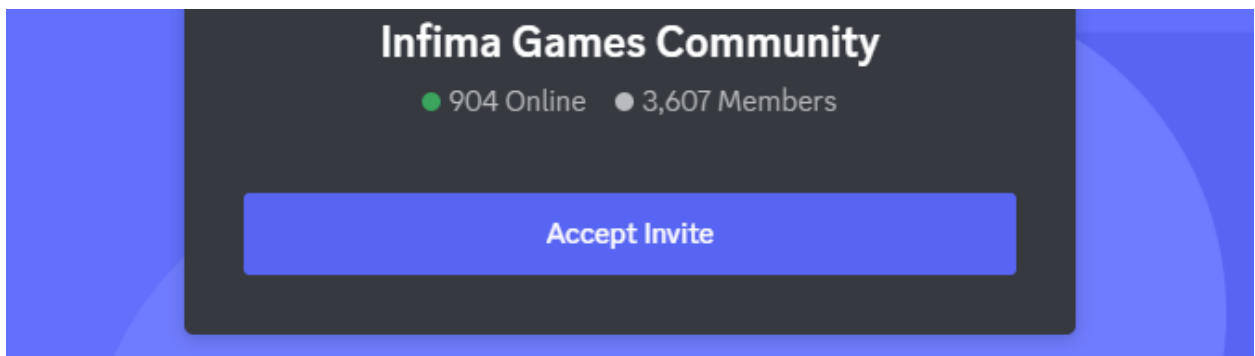

Note: You need to have a Discord account in order to be verified and access the documentation.
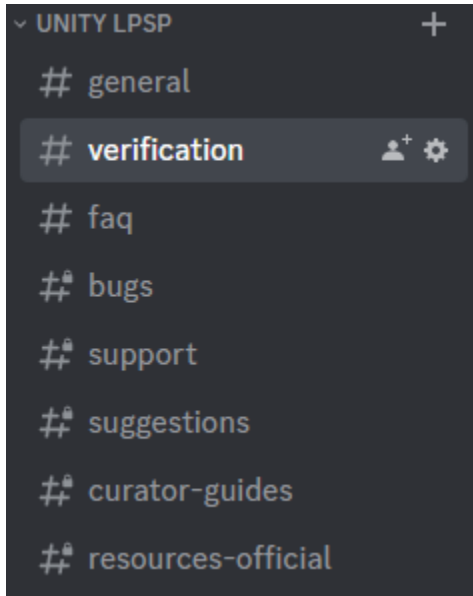

Here Is How to Do It

1. Visit the store page for the asset and click on the **Discord** link in the description.

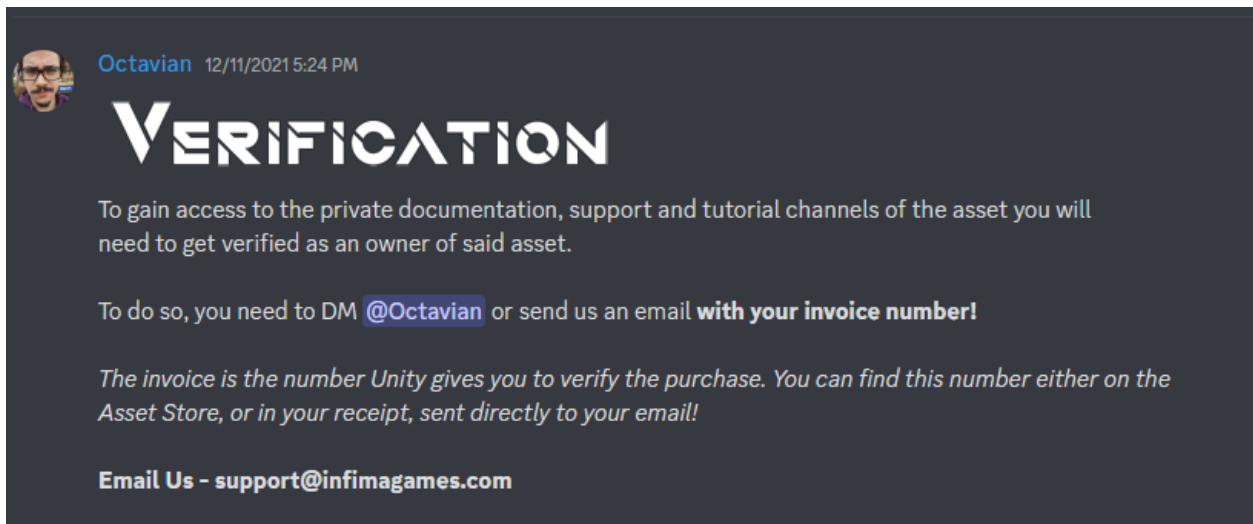

2. This will open up a new tab in your browser window, join the discord server by clicking on the **Accept Invite** button.

3. Once in the server, navigate to the **UNITY LPSP** section and click on the **Verification** channel.

4. Follow the instructions in the **Verification** channel in order to verify your purchase.

In order to get verified you can either send us an email at: support@infimagames.com or send a direct message to **Octavian.T#6323** on Discord.

Make sure that you include your **Invoice Number** or **Order ID**, as well as your **Discord tag**.

Email Example

To: support@infimagames.com
Subject: Discord Verification Unity LPSP
Hello, I want to get verified on Discord in order to access the documentation for "Unity - Low Poly Shooter Pack". **Invoice number:** IN00000000000 (Or) **Order ID:** #0000000000000 **Discord username:** User#0000 Thanks!

## Discord Message Example

> Hello Octavian!
>
> I want to get verified on Discord in order to access the documentation for "Unity - Low Poly Shooter Pack".
>
> Here is my invoice number: IN00000000000 (or) order ID: #0000000000000

The **Invoice Number** or **Order ID** can be found in the receipt from Unity, or under the **Order History** of your asset store account.

5. Verification requests are processed manually, and approval may take 1-4 business days.

Once you are verified you will receive two new server roles, **Verified** and **Unity LPSP**.

This will grant you access to the **resources-official** channel which contains the documentation, guides and tutorials, as well as access to the **support** channel.

Thank you for your patience, and we hope that you enjoy the asset!
